

Printable chessboard

50 mm squares, 40 cm board, on 6 A4 sheets.

1. Print at 100% / 'Actual size' (turn off 'Fit to page').
Check the 50 mm bar at the bottom of each sheet with a ruler.
2. Matte paper works best: shiny paper reflects light into the camera.
3. Lay the sheets out as in the map below.
4. On every sheet except those in the top row, cut off the top white margin exactly along the edge of the printed area. Do the same for the left margin on every sheet except those in the left column.
5. Lay each trimmed edge over the 10 mm strip it overlaps on the neighbouring sheet, line up the pattern, and tape or glue it from the back.
6. Glue the finished board onto card or foam board to keep it flat.

— should measure 50 mm
